

Poster Report BADS Annual Scientific Meeting 2017

Tim Rowlands

It was a pleasure to review the posters at this years annual scientific meeting in Southport. Although less in number than previous years, they covered a wide variety of topics relevant to daycase practice with many novel approaches to aspects of care and quality. As usual the standard of the posters was high and exceptional in presentation. We recognise the hard work for all concerned that goes into converting an abstract into an interesting and meaningful presentation. Certificates are awarded to those posters where the judges felt the work was particularly outstanding.

The judges this year were Theresa Hinde (Anaesthetist), Fiona Hindle (Nursing and Management) and myself (Surgeon). We would like to thank everyone who submitted abstracts and exhibited posters this year. I would particularly encourage you to consider expanding your work as seen in the posters and submitting for consideration for publication in the Journal of One Day Surgery as soon as possible.
